BOLIDEN

Quality Policy

Boliden is an international metals company that focuses on a long-term approach and sustainable development. Our core competencies lie in exploration, mining, smelting and metal recycling.

Boliden strives to be a company governed by its values Care, Courage and Responsibility, which form the basis for how we develop our business.

- We focus on continuous improvements, addressing challenges and opportunities, and ensuring efficient stable work processes.

- We trust in people and encourage everyone's commitment, across our complete value chain and at all levels of the company, to build the quality mind-set.

- We are reliable and deliver on our promises to customers as well as to other internal and external stakeholders.

- Our decisions are evidence-based and taken on the right organizational level.

- All units shall comply with international, national and local regulations relevant to our operations, and have a management system in line with ISO 9001.

BOLIDEN

All Boliden employees shall be fully committed to this policy and to the integrated Boliden Management System.
